

Help protect Greece's most valuable non-renewable resource: its cultural heritage.

SAY YES TO GREECE'S REQUEST
to restrict U.S. import of antiquities

- Widespread looting has resulted in an irreparable loss of knowledge about Greek history.
- 90% of the known Early Bronze Age objects from the Cycladic islands of Greece have no archaeological provenience.
- An estimated 85% of all Early Cycladic sites have been looted.

The best way to understand cultural artifacts is within their archaeological, architectural and historical contexts, when they have been scientifically examined and professionally preserved.

SAFE SAVING ANTIQUITIES FOR EVERYONE
